
Flickr {\$EmptyText}

Posted by nick - 2014/04/07 20:34

I am getting {\$EmptyText} when trying to display a flickr set with the plugin? Any tips?
Got a blank page when generating the token (still have the url, is the token there?)
So then tried setting the photos to public but still get {\$EmptyText}?

Hello,

Could you specify what plugin code do you use and send screenshot(s) of plugin settings page by email?

Regards,
ARI Soft
