Master/Detail table
Posted by mitja100 - 2014/04/23 18:17

_____

Hi,

I am using DataTables for master table. I would like to show details data with parameter in lightbox. I used "lite" version and lightbox call looks like this:

Click here

Now I bought ARI Sexy Lightbox and I would like to show ARI data table module (details table) in frame.

How can I call ARI Sexy Lightbox, which show ARI Data Tables module and sends parameter?
In ARI data table i am using SQL syntax like:
select * from myTable WHERE ID = {$REQUEST:myID}

I checked this one:
http://www.ari-soft.com/ARI-Sexy-Lightbox/43381-Integration-with-ARI-Data-Tables.html

But is shows article, not only module. I would like to have clean table-only lightbox.

Thank you for your help.

_____

Hello,

Could you send a link to a page where we can see what currently is shown?

Regards,
ARI Soft
