## sexy lightbox in k2 image field

Posted by maggoo - 2014/05/06 18:58

---

Hi,

I would like to use sexy lightbox in k2 items instead of squeezebox. The code i think needs changing in item.php is:

=====

Hello,

Set rel="sexylightbox" attribute for tag and enable and configure "System - ARI Sexy Lightbox" plugin. Set also "Mode" parameter to "Anywhere" in plugin settings.

Regards,  
ARI Soft

Many thanks for your very speedy reply.

It was indeed a question of just adding a rel, like so:

=====

Ah, i was expecting the opposite with those settings, my bad:)

All working now, great support, tx!
