## Flickr photos disappeared again {\$data:sexyimage}

Posted by Arnstein - 2014/07/02 21:03

---

Hi

I use the plugin to display photos from a Flickr account, but now the articles suddenly only show the string {\$data:sexyimage} instead of the actual photos. The plugin code I call in the articles is like this: {arisexylightbox activeType="flickr" type="flickrimage" source="photoset" thumbSize="medium" photosetId="72157600204877935" photoid="14437012832"}{/arisexylightbox}

Also, I have an article where I display all my Flickr photo-sets using your module of ARI Sexy Lightbox (mod\_arisexylightbox. The article now only displays {\$emptyText}. The code I call from this article is: {arisexylightbox moduleId="27"}{/arisexylightbox}

Any ideas please?

Hello,

Check that the latest version of the module (1.11.0) is used.

Regards,

Thanks

The module, mod\_arisexylightbox, version 1.10.7  
The plugin, ARI Sexy Lightbox Anywhere, version 1.10.4

Thanks, but the plugin and module still shows the same version number and the problem is still the same..? Sure you upgraded the correct site? My site is [www.lillehammerklatreklubb.no](http://www.lillehammerklatreklubb.no).

Sorry, this message was to another user with similar problem. The latest version of the extension is available in "Member Area". Download and upgrade it. If you have any problem with it, send credentials for your J! backend by email and we will upgrade the extension on your site.

Regards,  
ARI Soft

Great stuff, the new module did the trick (upgraded the plugin too) :-)

Thanks a lot :-)  
Arnstein
