
Only one image is showing in my Flickr PhotoSet mo

Posted by redsage - 2014/08/12 00:18

I installed Ari Sexy Lightbox and I've used it previously - this is a new issue for me though.

There are 54 photos in the photoset and I've done a batch edit to all photos to make them viewable by public. However, only the first image is visible on the page:

<http://hsvmasterchorale.org/news/gallery>

Here is the photo set on flickr: <https://www.flickr.com/photos/123332125@N07/sets/72157645958486727/>

Please advise.
thanks!

Hello,

Do you use the module or the plugin? What settings (plugin code) you use?

Regards,
ARI Soft

This is the module.

Type: Flickr Gallery (from the dropdown)
have the API key and secret key entered, flickr token is blank as all photos are set to public
image count: 50
source: photosets includes photoset ID
Layout type: flickr photosets from dropdown
items per row: 4

Could you send values which you use by email or provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
