
Ari Sexy Lightbox on test linking to an image.

Posted by morten44 - 2014/09/15 14:10

Hi

<http://new.adpp-mozambique.org/en/education/teacher-training>

I have 2 images on this page.

The visible image works great

Then i want to link an image to "show map" at the bottom

I cant find out howto get it opened with Ari Sexy Lightbox.

I guess its what you refere to inline image in your manual?

Not sure how to adopt it to my image

The current code is

the map

It should just open in Full Size

Any ideas?

Thanks in advance

Hello,

Install "ARI Sexy Lightbox" module, then install, configure and enable "System - ARI Sexy Lightbox" plugin and use the following code:

the map

Regards,

ARI Soft

Hi

Thanks for your advise

That worked like a sharm
