
Flickr photo title cut short in Lightbox Anywhere

Posted by Arnstein - 2010/06/28 11:49

Hi

I've discovered a problem when using your Lightbox Anywhere plugin.

When using the plugin to show Flickr photosets in articles, some of the photo titles from Flickr are cut short (showing only the first part of the photo title). If I display one of the photos with this symptom as a single image in an article, the entire title is displayed. In other words, the title is cut short for some images when displayed as part of a photoset, but not when displayed as single image.

The syntax I use to show photosets are: {arisexylightbox activeType="flickr" source="photoset" thumbSize="thumbnail" photosetId="72157594200044181"}{/arisexylightbox}

regards,
Arnstein

Hello,

Download the extension in 'Member Area' on our site and upgrade 'ARI Sexy Lightbox' module, please. It should help.

Regards,
ARI Soft

Great, it worked :cheer:
Thanks again for fantastic support!

regards,
Arnstein
