Pop up in module appears behind popup

Posted by wingnutter - 2014/09/29 19:37

_____

Hi,

Great lightbox, however, I have installed a module with the lightbox that also has a popup window. Unfortunately the pop up window appears behind the light box. Any ideas?

http://www.childrens.......e.com/index.php/privacy-policy is the URL, and the green text in the top right hand corner "request a callback" activates the lightbox. The 'Time Required' box is the problem!

Thanks.

_____

Hello,

Add the following CSS rule to a site template CSS file:

BODY .xdsoft_datetimepicker {z-index:40000;}

Regards,
ARI Soft
