Call hidden div from imagemap

Posted by clambio - 2014/12/01 16:00

_____

Hello,
I have a rather complex imagemap and want to call the Lightbox by clicking on mapped areas. Within the Lightbox I want to open several hidden Â´s. For every mapped area another .

Here a codesnippet:

SNIPPET OF MY IMAGEMAP

SNIPPET OF ONE OF MY HIDDEN DIV WHICH I WANT TO DISPLAY

Yes, I installed the system everywhere PlugIn and it is activated.
Thats the link to website: http://fonag.org.ec/inicio/link2c
The Lightbox shall be called when clicking on the red flowers under the speaking bubble, on the bottom in the middle of the image.
I am working with Joomla 2.5.19.

Thanks a lot!

_____

Hello,

Is it possible to see the problem?

Regards,
ARI Soft

_____

Sorry, just realised it.
Updated my question.

_____

Check that "System - ARI Sexy Lightbox" plugin is installed, enabled and configured. Set also "Load" parameter to "Always" in plugin settings.

Regards,
ARI Soft

_____

That should be all good.
Here a screen of my settings.

_____

We wrote about "System - ARI Sexy Lightbox" plugin, not about "System - ARI Sexy Lightbox Anywhere" plugin.

Regards,
ARI Soft

Jesus,
thats embarassing. Sorry for keeping you guys busy with my "disability" to read!
It works like a charme now :)
Thanks a lot again!
