
Overlay Opacity Problem

Posted by jeenarajeev - 2015/06/24 13:34

I used this fine extension in one website. I am not able to change opacity of overlay through css override.

I am using light version.

Is there any way to change opacity to 0.6 to 0.8

Thanks

Hello,

Add the following CSS rule to a site template CSS file:

```
.sexy-overlay {opacity:0.8!important}
```

Thanks
Unfortunately it did not work.

I put this in template css

```
.sexy-overlay {  
  opacity:0.8 !important;  
}
```

Can you look on below link? light box link with: See All News

Sorry, "ARI Sexy Lightbox Lite" doesn't support this ability. The CSS rule changes opacity for "ARI Sexy Lightbox" extension.
