responsiveness of sexylightbox Posted by dtws2008 - 2015/07/29 10:00
I use sexylightbox plugin in ARI smart content in conjunction with datatables. datatables is responsive but what about sexylightbox? it seems that it is not responsive. Am I doing something wrong?
Re:responsiveness of sexylightbox Posted by admin - 2015/07/29 20:36
Hello,
"ARI Sexy Lightbox" supports ability to set "width" and "height" parameters in percent, but it doesn't change lightbox size if browser's windows is resized when a lightbox is opened.
"Fancybox" addon is fully responsive.
Regards, ARI Soft
