Flicker problem

Posted by MarcVdH - 2017/01/24 13:29

_____

if I do I go to see photos will show a Flickr album in my site, only empty {$ text}.
{Arisexylightbox active type = "flickr" source = "photoset" collectionId = "72157677847909720" userId = "102215017 @ N03"} {/} arisexylightbox
a picture showing on my webspace, does work
{Arisexylightbox active type = "inlineimg" thumbWidth = "125"}
content ... content ...
 {/} Arisexylightbox

page: http://www.wandelkriebels.be/index.php/wandelen/tweelanden-wandelroute

Do you have a solution to this problem?

_____

Hello,

Have you specified Flickr API key in "System - ARI Sexy Lightbox Anywhere" plugin settings? Check "Choose type -> Flickr gallery -> Flickr API key" parameter. Check also plugin code which you use. The shortcode from your post has an incorrect syntax and contains unnecessary spaces. It should look like:

{arisexylightbox activeType="flickr" source="photoset" collectionId="72157677847909720" userId="102215017@N03"}{/arisexylightbox}

Regards,
ARI Soft

_____

It seems you want to show data from a photoset (not collection). For this use the following plugin code:

{arisexylightbox activeType="flickr" source="photoset" photosetId="72157677847909720" userId="102215017@N03"}{/arisexylightbox}

Regards,
ARI Soft

_____

The following plugin code is working fine on our test site:

{arisexylightbox activeType="flickr" source="photoset" photosetId="72157677847909720" userId="102215017@N03"}{/arisexylightbox}

If it doesn't work on your site, could you provide a temporary access to your J! backend by email so we can check settings and shortcode?

Regards,
ARI Soft
