
ARI Sexy Light Box and PHP7

Posted by mcintyro - 2017/01/29 21:30

Please help, I upgraded my Joomla site to PHP7 and now the Lightbox gives this error:

Front End:

Warning: Declaration of AriDateUtility::toUnix(\$date, \$local = true) should be compatible with JDate::toUnix() in /home/borderhi/public_html/administrator/components/com_arismartbook/kernel/Utils/j16/class.DateUtility.php on line 104

Back End:

Deprecated: Methods with the same name as their class will not be constructors in a future version of PHP; plgSystemArisexylightbox has a deprecated constructor in /home/borderhi/public_html/plugins/system/arisexylightbox/arisexylightbox.php on line 17

Hello,

Download and update "ARI Sexy Lightbox" extension (module and plugin(s)). It should help.

Regards,
ARI Soft
