Inline Content not working

Posted by freshlookweb - 2017/02/07 05:34

_____

I can't seem to get the inline content popup to work. This is my test page - http://equineandcaninemassage.com/test-page

I tried disabling other plugins, using different template, changing settings, no luck. On the newest version of Joomla and I think php7. Thank you

_____

Hello,

Use rel="sexylightbox" attribute instead of rel="popup" in tag.

Regards,
ARI Soft

_____

I've tried running more tests and I figured out that if I embed it in an article it works. If I embed it in the template, or in a module, it doesn't work. Any idea why that would be happening?

If I embed it in an article AND in a module (so that it shows up twice in the same page), both work. It's like there's a script being included in the article that enables it that doesn't show up when it's just the module.

_____

"ARI Sexy Lightbox Lite" is a content plugin. Joomla! executes content plugin in articles. If you need plugin which will work in any content, "ARI Sexy Lightbox" package contains "System - ARI Sexy Lightbox" and "System - ARI Sexy Lightbox Anywhere" plugins which can work anywhere.
