
SexyLightbox.show - doesn't open lightbox

Posted by Jonas Schlenker - 2017/02/22 15:46

Dear all,

I have tried to open url from storelocator component in lightbox by the following javascript:

name

Unfortunately it doesn't work. Any ideas what could be wrong?

Hello,

Try the following code:

name

Hello,

thanks for your message. I tried this:

```
html += " + VISIT_SITE + ' >>';
```

Currently I'm getting a Syntax Error: missing ; before statement

Still something wrong? Any ideas?

Best Jonas

Escape ' symbol:

```
html += " + VISIT_SITE + ' >>';
```

I have copied the code into my map.js file. Unfortunately the link disappears.

It seems this is a problem with your code. For example the following code is working fine:

```
jQuery('BODY').append(jQuery(" + 'link' + ' >>'))
```

Check that VISIT_SITE variable contains a value. If it doesn't help, we can check your code if you provide a link to a page where it is used.

Hello,

here is a link to the website:

<http://bestattungswald-neuried.de/baumsuche>

You will find link in sidebar next to map. I'd like to open this link in lightbox and also the link, that appears in the map, when you click on "1 - Hainbuche".

Attached you will find map.js that is currently used and adapted map.js.

Thanks for your support!

Best Jonas

At first remove our sample code with jQuery. We provided it only to show that our code snippet is working. About your modification, this problem with URL which is used. It contains unnecessary \ symbol at the end and it breaks the code. You can use the following code:

```
html += " + VISIT_SITE + ' >>';
```

Regards,
ARI Soft
