
How To - slideshow of content

Posted by jmef - 2010/08/02 07:18

Hi,
I wish to create a slide-show of articles/ content whereby users can click to the next page inside lightbox.

It is not clear from your general instructions, how to do this.

Cheers!

Jeroen

Hello,

'System - ARI Sexy Lightbox Anywhere' or 'System - ARI Sexy Ligthbox' plugin can be used for this purpose. If you want to use 'System - ARI Sexy Lightbox' plugin, the following HTML code can be used:

Article 1

Article 2

Article 3

If you want to use 'System - ARI Sexy Lightbox Anywhere' plugin, use the next code:

```
{arisexylightbox activeType="rcontent" groupName="articles" width="300" height="250"
url="index.php?option=com_content&view=article&id=1" title="Article 1"}Article 1{/arisexylightbox}
```

```
{arisexylightbox activeType="rcontent" groupName="articles" width="300" height="250"
url="index.php?option=com_content&view=article&id=2" title="Article 2"}Article 2{/arisexylightbox}
```

```
{arisexylightbox activeType="rcontent" groupName="articles" width="300" height="250"
url="index.php?option=com_content&view=article&id=3" title="Article 3"}Article 3{/arisexylightbox}
```

Regards,
ARI Soft

THANKS!

The system-plugin approach works great, but unfortunately it shows the whole website, meaning: as if you are opening the article page in an iframe as an external page with the complete template.

Is it possible to show content articles clean inside the lightbox (no template build up)?

Thanks again.

Jeroen

Yes, it's possible. Add `tmpl=component` variable to an article link. It will look like:

Article 1
