
zoom image in lightbox

Posted by Shemeam - 2017/05/05 15:27

Hi, when the images open in the lightbox I would like the user to be able to zoom in on specific parts of the image, is this possible?

also is it possible to have the image title above the image on the thumbnail gallery view?

Hello,

1. The extension doesn't support the described zoom feature.
2. Could you provide a screenshot where we can see what you want to achieve?

Regards,
ARI Soft

Yes, the page currently looks like this
<http://www.hamptonlucyneighbourhoodplan.co.uk/maps>

you will see that the image title is below the image

we would like it to look like the uploaded image with the title above the image
<https://www.walc.org.uk/images/maps.gif>

It is necessary to edit
/modules/mod_arisexylightbox/includes/kernel/SexyLightbox/Models/Templates/class.SimpleGalleryTemplate.php file
and replace the following code:

```
Â  
  
{ $data:sexyimage }  
  
{ $GalleryCaption }
```

with the following one:

```
{ $GalleryCaption }
```

Â

{\data:sexyimage}
