
Cutting Thumbs

Posted by DanielSw2 - 2010/08/04 23:11

Hello,

We want to change our Thumbs a little bit. We have a lot of different Pictures in our Gallerys and some Thumbs aren't look very well. Some Thumbs are fitted good and some are warped.

So is it possible that the Thumbs are cutted out automatically. Like here: <http://www.simtimes.de/2010/diesims3/late-night/deutsches-logo-zu-die-sims-3-late-night-veroeffentlicht-5916/>

Thank you!

Greetings,
Daniel

Hello,

Do you want to crop part of original image and then create create thumbnail for this cropped part?

Regards,
ARI Soft

Hello,

No just the Thumbs should be cutted.

Could you describe in more details this functionality. For example an original image has 450 x 231 size. Thumbnail size is set to 150 x 77. What the extension should to do?

Regards,
ARI Soft

Some Thumbs are fitted very well and some are warped. So it doesn't look very good, look here: <http://simway.net/sims2-family-fun-accessoires-bilder/artworks>

This is because some Pictures are higher and some are wider. When the Thumbs are cuttet every thumb has the same proportions.

Do you know what i mean?

I guess that is the crop function.
But I don't know how it works and how i can configurate it.

Regards

Hello,

If you want to use 'crop' functionality with 'System - ARI Sexy Lightbox Anywhere' plugin. The code will look like:

```
{arisexylightbox thumbType="crop" x="10" y="20" thumbWidth="200" thumbHeight="100"}{/arisexylightbox}
```

This code crop part of an original image with size 200 x 100 and starts to crop image from point with the following coordinates (10, 20).

Regards,
ARI Soft
