## Files Filter
Posted by Ellsinore - 2018/03/27 14:55
_____

I have thumbnails in my folders that I don't want rendered on the pages.  I'm using this File Filter in the "System - ARI Sexy Lightbox Anywhere" settings:

(^(?!thumb_).+)\.(jpg|gif|jpeg|png|bmp|JPG|GIF|JPEG|BMP)$

But, for example, this one is still showing up in the gallery:

thumb_706_dakota_stallings.jpg

The photos are numbered 700 and up for that page.

The file filter for the plugin code for that page is:

fileFilter="^.*7.*$"

Thank you!

I just realized the .csv files are showing in the gallery, too.  So do I have the main File Filter setting in the right place?

Thanks!

Hello,

(^(?!thumb_).+)\.(jpg|gif|jpeg|png|bmp|JPG|GIF|JPEG|BMP)$ regex should work fine. Could you provide a link to a page where the problem occurs?

Regards,
ARI Soft

_____

This is the page with the first example:

http://cousin-collector.com/projects/index.php/andrew/cemeteries/3298-savannah-cemetery-section-15?showall=&start=7

_____

Could you provide a temporary access to your J! backend by email so we can check plugin settings?

Regards,
ARI Soft

_____

Try now. We used the following regex in plugin shortcode:

(^(?!thumb_)).*7.*$

Regards,
ARI Soft

_____

Yes, that worked on that page.  Do I need to apply this to all my shortcodes?  That would be a massive task.  :-D

====================================================================

## Re: Files Filter

_____

Yes, it requires to use different regex for different shortcode.

Regards,
ARI Soft

_____

For *each* shortcode?  There are thousands -- and once they're referenced in the other program, there will be a thumbnail generated by that program for every image.  There are over 70,000 images so far --

Is there no way to get the filter in the plugin settings to work?

My brain just exploded.  :-D

_____

Your shortcode depends on current page (GET or POST parameter, for example show 7xx images on page #7, 6xx images on page #6 and etc) so it is not possible to use a static shortcode for all cases.

Regards,
ARI Soft

_____

So that's why the .csv and .pdf files are showing up also?  The plugin settings file filter has no effect?  I've never seen those show up before, though.

Okay -- this is a mess.  Thanks.  :-)

_____

Add supported file extensions to regex. The extension filter files based on the provided regex.

Regards,
ARI Soft

_____

This is the regex in the plugin settings:

(^(?!thumb_).+)\.(jpg|gif|jpeg|png|bmp|JPG|GIF|JPEG|BMP)$

Does that not limit the output to files with those extensions?  I don't understand regex at all -- that's why you've always written it for me.  :-)

_____

This regex works fine. It shows all images without thumb_ prefix, but you override regex in plugin shortcode. In this case regex from plugin settings is not used and uses only regex from shortcode.
