
Article in Lightbox does not use css of article

Posted by pgerlach - 2010/11/01 15:31

When an article is shown in the lightbox, the css (default.css) is not used.
How can I force it to use these styles?

Hello,

We suppose this problem with site template. The extension shows articles in component view and it seems you site template doesn't include default.css file in component view. It can be checked in /templates//component.php file. If you can provide temporary access to your Joomla! backend by email we can check it for you.

Try now please. We have created component.php file for your site template because it didn't contain it.

It all works fine now.

Thanks!
