## Displaying Article In Sexy Lightbox

Posted by DShapiroNaples - 2011/01/06 16:15

---

I would like to display a Joomla article in a Sexy Lightbox. I want the Lightbox to appear when a hyperlink is clicked from a different article.

I have read the documentation but I am having trouble exactly how to configure the module and the plugin and what html code to use in the tag of the article that will have the hyperlink in it.

Hello,

1. If you use "ARI Sexy Lightbox" module, set "Choose type" parameter to "Article" and specify ID of article which should be shown into lightbox in "Article ID" parameter.

2. If you use "System - ARI Sexy Lightbox Anywhere" plugin, type the following code into an article:

```
{arisexylightbox activeType="article" width="300" height="250" id="ARTICLE_ID" link="Show article" title="Article"}/{/arisexylightbox}
```

Where ARTICLE\_ID is ID of article which you want to load into lightbox. For example if ID = 97, use the following code:

```
{arisexylightbox activeType="article" width="300" height="250" id="97" link="Show article" title="Article"}/{/arisexylightbox}
```

3. If you use "System - ARI Sexy Lightbox", type the following HTML code into an article:

Show article

Where ARTICLE\_ID is ID of article which you want to load into lightbox. For example if ID = 97, use the following code:

Show article

Regards,  
ARI Soft
