

Layout question

Posted by peterva - 2011/03/08 09:54

Hi, I am using the advanced gallery to show all images from a Picasa album. This works fine.

But is there a way to show just the first 6 images from the album, and the rest only on clickthrough when the gallery is opened? So what I mean is limit the repeater to 6 images (or 2 rows).

Here's my setup:

```
{repeater}
  {headertemplate}
    {/headertemplate}
    {rowtemplate itemCount="3" rowClass="odd;even"}
      {celltemplate}
        {$data:colorboximage}
      {emptycelltemplate}
      {/emptycelltemplate}
    {/rowtemplate}
  {footertemplate}
  {/footertemplate}
  {emptytemplate}
  No items found
{/emptytemplate}
{/repeater}
```

Hello,

Download and upgrade "ARI Colorbox" module and "System - ARI Colorbox Anywhere" plugin (if you use it). New version of the extension provides new parameter "Visible items count" for "Simple gallery" layout type.

Regards,
ARI Soft
