
Scale External

Posted by natselection - 2011/05/08 15:41

I'm probably hoping for the impossible but is there any chance of scaling an external url when it opens in the colorbox?

Some sites that render dynamically load background images at the width of the color box but content extends past the images and looks odd when you scroll over.

Hello,

Sorry, but the extension can't work in described way.

Regards,
ARI Soft
