
Colorbox not working in J1.7 Expected update date?

Posted by outtherechris - 2011/07/23 10:10

Hi

Is there an expected time for an update to the Colorbox plugin and module for functionality with Joomla 1.7?

I have updated several sites to 1.7 and Colorbox plugin isn't functioning on any of them.

Is there a work around until the update?

Thanks

Hello,

Download the latest version of the extension from "Member Area" on our site and upgrade the module and the plugins (if you use them). The latest version of the extension should work fine with J! 1.7.

Regards,
ARI Soft
