
Some help for a stupid german...

Posted by Sellfactor - 2011/08/16 15:23

Hi there,

i already read the whole text inside
the plugins next to the module.

Shame on me but I need to tell:
I haven't understood how to create a link
that opens the ARI Colorbox with my module
inside.

How is the syntax that I have to use?

Can somebody post some examples please.

Thank you very much ahead!

Hello,

If you want to use "System - ARI Colorbox" plugin, enable and configure the plugin. After this you can place the next
HTML code into your module:

Goooooogle

If you want to use "System - ARI Colorbox Anywhere" plugin, enable and configure the plugin (set "Mode" parameter to
"Anywhere"). After this you can place the next code into your module:

```
{aricolorbox activeType="rcontent" opt_width="300" opt_height="250" url="http://www.google.com" link="Show google  
site" title="Google"}}{/aricolorbox}
```

If you use a WYSIWYG editor, switch it to plain text mode before inserting plugin code because editors can add extra
HTML code in design mode.

Regards,
ARI Soft

Thanks for that fast reply -

but that I already know :)

For example, if you want to show articles with the next article IDs: 27, 45, 77. Use the next code:

testheading 2

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua. At vero eos et accusam et justo duo dolores et ea rebum. Stet clita kasd gubergren, no sea takimata sanctus est Lorem ipsum dolor sit amet. Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua. At vero eos et accusam et justo duo dolores et ea rebum. Stet clita kasd gubergren, no sea takimata sanctus est Lorem ipsum dolor sit amet.

- link 1

- link 2

- link 3

If you want to show a module, you can crate new article, load necessary module in created article with help "Content - Load Module" standard Joomla! plugin and then show the article into the lighthbox.

Regards,
ARI Soft
