How to show descriptions

Posted by vickiwatson - 2011/09/06 01:15

_____

I have colorbox working and have a csv file with titles and descriptions. Titles are displaying, but not descriptions.

How do I get descriptions to display?

Ideally, I'd like to see just the description displayed under the thumbnails on the gallery page and just the title under the image in the popup window.

_____

Hello,

Download and upgrade "ARI Colorbox" module and "System - ARI Colorbox Anywhere" plugin (if you use it) please. New version of the extension contains "Image gallery -> Caption template" parameter. Set it for example to {$Caption} and rename 3rd column in CSV file to Caption (now it is empty).

Regards,
ARI Soft

_____

Thanks! That worked perfectly. Title (2nd column in csv file) is displayed under the thumbnails in the gallery and Caption (3rd col) is displayed in the popup window.
