
Can use w/ AUTHOR profile create an ARI Colorbox?

Posted by rmc - 2012/04/10 13:43

I am co-webmaster for a Joomla! 2.5.1 site. We are still feeling our way through the process, but are very happy with what we've got so far.

Our social organization has 18 activity groups such as Biking, Bridge, Fishing, Hiking, ..., Wine Tasters. Each activity has a base article hung off the ACTIVITIES menu, and each activity has one or two members with AUTHOR permissions for their activity.

Is there a way to give a login account with AUTHOR permissions a mechanism for creating an empty ARI Colorbox module? Some of them have weekly events and we webmasters would like to get out of the loop for creating galleries.

The authors have ftp access to a directory structure particular to their activity. For example, the hiking group would see public-html/images/Activities/hiking as their root folder, within that they see directories DOCS, IMAGES, PDFS and any other directory that they might create. For the "Kent Falls April 8 2012" hike they would create a folder in Images named "Kent Falls April 8 2012" and load their images there.

We would love a mechanism whereby an author would provide their group name: Hiking, and the gallery title "Kent Falls April 8 2012" and all of the steps to create an empty module would be done for them.

Can this be done? My co-webmaster has a medium knowledge of PHP, I don't even know how to spell it.

Hello,

Joomla! doesn't provide ability to configure modules on frontend, but you can use "ARI Colorbox Anywhere" plugin in articles.

Great. But how do I acquire ARI Colorbox Anywhere? On your home page I went to PRODUCTS and did search for COLORBOX ANYWHERE, just COLORBOX, just ANYWHERE, PLUG-IN, PLUGIN etc., and nothing shows up. Is it part of a product suite, or known by another name? Is it unpublished?

The plugin is available in aricolorbox_unzip_first.zip archive which can be downloaded in "Member Area" on our site.

I'm not getting a gallery. I've scanned the forum and found several places where you ask for logon permissions, and

then the next post is "Thanks" - but no clue as to what the solution to the problem was. It would have been informative to have posted the fix.

Here's what I've tried. Note that I've tried both 10021 and 10022 for the moduleId.

Complete content of the article as viewed by 'plain text' editor (rather than JCE)

```
{aricolorbox moduleId="10021"}
{aricolorbox activeType="imglist"
dir="images/Activities/Procrastinators/Images/OrgMeeting" generateThumbs="true"
thumbWidth=70 thumbHeight=70 thumbType="resize" type="gallery"
itemCount=4
} {/aricolorbox}
```

The full path to the folder containing the images is:
/public-html/images/Activities/Procrastinators/Images/OrgMeeting
There are about two dozen .JPGs in the above folder.

In Plug-in Manager: Plug-Ins I have

System - ARI Colorbox status:Enabled Type:system Element: aricolorbox Access:Public ID:1022

Going into details..

Status: Enabled

Acess: Plublic

Try to use the next code instead of your code:

```
{aricolorbox moduleId="10021"}{/aricolorbox}
```

```
{aricolorbox activeType="imglist" dir="images/Activities/Procrastinators/Images/OrgMeeting" generateThumbs="1" thumbWidth="70" thumbHeight="70" thumbType="resize" type="gallery" itemCount="4"}{/aricolorbox}
```

If it doesn't help, could you provide a link to a page where we can see a problem by email?

Regards,
ARI Soft

Thank you, that did it.
I'll now compare to see what changed!
