
Video from content lays over opened colorbox

Posted by subster - 2010/06/07 06:57

Hi there,

please visit <http://azteka.de> and click onto the link in the footer (Blue button - "Kontaktieren Sie uns heute").
The colorbox opens but the video in of the content area does not get overlayed by it, the video overlays the content of the box instead.

IE - Problem only!

Any help is appreciated - Thank you!

Hello,

It happens due to "wmode" parameter of tag for video on your page equals to "window". Set it to "transparent" and everything should work fine.

Regards,
ARI Soft
