## Popup doesn't like good

Posted by Reisebine - 2014/02/13 18:19

---

Hello,

I installed the colorbox and the thumbnails with shadow and white frame look great but when I click on a thumbnail the popup with the photo doesn't look nice.

There is no real background and the nice grey frame and the white frame around the photo are missing.

Layout type: Simple gallery

I put the "Max With" to 90% as mentioned in the help section.

I guess the setting of my parameters are wrong.

What can I do?

Hello,

It can be a conflict with a 3rd party extension or site template styles. Could you provide a link to a page where we can see the problem so we can investigate it?

Can I send you the link via eMail because the site is not open for public yet?

Thank you very much - I works.  
You are great!!!!

But there are still two little mistake which - I guess - have nothing to do with the template.css

1. wrong previous button
  2. space between photo and buttons

1. Download and upgrade the module. After this clean browser's cache. It should help.
2. The following CSS rule is added directly on pages (we suppose it is added by site template) and this CSS rule adds padding:

```
#cboxLoadedContent {  
    padding-bottom:30px;  
}
```
