# Popup/Slideshow not working

Posted by dkwebstudios - 2014/07/19 17:40

_____

Hello.  I am using ARI Colorbox for a Simple Image Gallery, but when I click on the picture it takes me to a separate page with just the picture on it.  I would like the picture to pop up on the same page, like I've seen on your demos.  For some reason I can't get this to work.  One of my webpages that this is happening on is:

Hello,

Set "Load jQuery Method" parameter in module settings to "Local copy".

Regards,
ARI Soft
