## What do I need to get it work?

Posted by nachrichtentruppe - 2014/08/04 15:05

---

Hi all together...

I'm a beginner in Joomla! and because of that, I bought ARI colorbox, just to have an easy plugin for creating image galleries in my articles...

But... it looks like I'm to stupid...

What do I need to do to get it work? I activated the plugin. But what do I have to do next?

Thank you very much in advance! :)

kind regards,

Stefan

Hello,

Documentation how to use the plugin is available in "Description" section on plugin settings page. For example if you want to show images from /images/album1 folder, use the following plugin code:

```
{aricolorbox activeType="imglist" dir="images/album1" thumbWidth="125"}{/aricolorbox}
```

you can also use "ARI Colorbox" module, all parameters for the module is configured on module settings page.

PS: Check also the module is installed.

Regards,  
ARI Soft
