
Title responsive?

Posted by Marsm - 2017/10/09 19:53

Hello,

for the title to an image, I need to use longer text.

This works fine on a wider screen like laptop, but gives a problem with smaller screens. The beginning and ending of the text is on a smaller screen not readable. See attach.

Is it possible to make the text responsive?

Regards.

Hello,

You can add the following CSS rule to a site template CSS file if want to change title font size depends on screen size:

```
@media only screen and (max-width: 500px) {  
  BODY #cboxTitle {  
    font-size:10px;  
  }  
}
```

Regards,

Thanks, this works. Now the text is much better looking on a small screen.
