Extension error!!! (please, help!)

Posted by Israel.sms - 2011/01/09 14:35

_____

Hello, I bought the extension ARI ColorBox to integrate with Picasa web. Sounds like a very good tool for such integration.

When installing in my Joomla framework and in my template (Gavick based) system gives the following error:
Warning: simplexml_load_string() : Entity: line 1: parser error : Start tag expected, '

_____

Hello,

Could you provide screenshot with module settings (or plugin settings if you use the plugin) by email?

Regards,
ARI Soft

_____

Sure ... I am sending you the email now.

Thank you very much

_____

You haven't specify album name. Enter album name in "Picasa album" textarea and the module will work fine.

Regards,
ARI Soft
