
Gallery without singleimage

Posted by Marchert - 2011/03/08 16:54

Hello,

I wrote in my request:

"When clicking on an image in an article a nice pop up box opens with navigation and caption (optional with a description too). The clicked image should not appear in the pop up. I need this feature to show screenshots of programs."

You recommended Pretty Photo and I bought it.

Now I have problems to get it work as I need it. Please let me know how to archive this.

Regards
Peter

Hello,

Download archive package in "Member Area" and upgrade "System - ARI Pretty Photo Anywhere" plugin. After this the following code can be used:

```
{ariprettyphoto activeType="imglist" dir="PATH_TO_IMAGE_FOLDER" type="customtext"}}{/ariprettyphoto}
```

Where PATH_TO_IMAGE_FOLDER is path to image folder and LINK_TO_THUMBNAIL is link to thumbnail.

Regards,
ARI Soft
