
Collection title

Hi,

I am trying to have a page displaying all the sets within a collection. I have succeeded in doing that by setting the image count to "1", but it displays the image title not the set title.

Is this possible?

Here a link the page I want to display the collection

Flickr page with collection - <http://www.flickr.com/photos/gopenguins/collections/72157625912660202/>

Thanks in advance!
