## Youtube fullscreen?
Posted by brandonpeat - 2011/07/15 14:13

_____

I'm using Pretty Photo to display Youtube clips when the user clicks on a thumbnail image.  (I'm using the ARI Pretty Photo system plugin method.)

It works great -- BUT the Youtube controls don't have the "Fullscreen" button on them.

Why is this?  How can I enable fullscreen on the Youtube control bar?  Do I need to use a different linking method, or use the Pretty Photo module instead of the plugin?

Thanks for the great plugin, I just need to get this to work and I'll be all set.

_____

Hello,

Add fs=1 parameter to YouTube video link. In other words, if original link is
http://www.youtube.com/watch?v=qqXi8WmQ_WM use the next link
http://www.youtube.com/watch?v=qqXi8WmQ_WM&fs=1

Regards,
ARI Soft
