## Integration with Hotspots component

Posted by trax.namibia - 2011/08/01 17:47

---

Hi,

I have just bought Pretty Photo based on your your experience with integration into the Hotspots plugin. I am aware of of the fact that you have created a version which is compatible with Hotspots due to your work with Eliecer Marchante.

Do you think you will create a version specifically for Hotspots at any time in the near future?

Hello,

We have sent custom version of "ARI Pretty Photo" plugin by email. Check your mail please.

Regards,  
ARI Soft

Hey trax.namibia,

Did you solve the issues with PrettyPhoto? or still waiting?

A couple of guys using hotspots contacted me regarding the plugin, but I adviced them to wait until the problems we have now get solved.

I am checking around for another plugins, I will pass you the information through email.
