Using my own thumbnails ?

Posted by guyman95 - 2011/08/05 13:12

_____

Hi,

I tried to use my own thumbnails (thumbnails displayed in the article) in order to reduce the loading time and solve resizing problems because I am using images with differents sizes.

I have set the thumbnail path, set generate thumbnails to "no", cleaned the jommla and firefox cache, but there is no changes...

I hope you could help.Thanks in advance. http://www.ari-soft.com/images/fbfiles/images/thumbnails.png

_____

Hello,

Do you use the module or plugin? What value do you use for thumbnail path and where original images are located?

Regards,
ARI Soft

_____

Hi,

I am using the module.

I have created a folder "thumb" in my image directory.

My directory is :

images/stories/articleechos

So I have set the path like this:

images/stories/articleechos/thumb

After your post, I tried :

images/stories/articleechos/thumb/

and just

thumb/

But without succes...

I hope that you can help me.

Best regards.

_____

If thumbnails have the same name as original images, set "Thumbnail path" parameter to thumb/{$fileName} value.
