Create \"summary Gallery\"

Posted by eraz - 2011/08/10 06:28

_____

Hey, i would like to show an overview of my gallery categories with ARI Pretty Photo. For example: I have category Landscape, People, Stillife and so on, and would like to show the category's on one page with thumbnails. The thumbnails should act as link and direct to the respective picture collection (linke Landscape).

How can i do this?

One other question: Is Ari Pretty Photo compatible with ARI JReflection?

_____

Hello,

It is possible to create an article and place the next code for each gallery category in created article:

{ariprettyphoto activeType="imglist" dir="PATH_TO_IMAGE_GALLERY" thumbWidth="100" type="customtext"}{/ariprettyphoto}

Where PATH_TO_IMAGE_GALLERY is path to folder with images. LINK_TO_CATEGORY_THUMBNAIL is link to category thumbnail.

It is not possible to apply "ARI JReflection" plugin for "ARI Pretty Photo" images.

Regards,
ARI Soft
