Website menu hides behind ARI Photo Thumnail

_____

Hey, i have created the following gallery for testing:
http://www.spotcatch.net/

But there's a problem, if you move the cursor over the menuentry "Galerie", you can see that the drop down menu hides behind the thumbnail of the image beneath. Is there a way to fix that?

Hello,

Add the next CSS rule to a site template CSS file:

```
#s5_header_wrap
{
 position: relative;
 z-index: 100;
}
```

Regards,
ARI Soft

In what file you added the code? We don't see it on provided page.

Regards,
ARI Soft

_____

Remove "/*" code before the CSS rule. "/*" is used as comment in CSS files.

Regards,
ARI Soft

The CSS file contains incorrect code. Replace the next code:

TABLE.ari-theme-shadow .apretty-inner
{
 background-color: white;

#s5_header_wrap
{
 position: relative;
 z-index: 100;
}

with the following code:

TABLE.ari-theme-shadow .apretty-inner
{
 background-color: white;
}

#s5_header_wrap
{
 position: relative;
 z-index: 100;
}

Regards,
ARI Soft
