
ARI pretty photo step by step

Posted by webmaster - 2011/09/21 06:08

1. Where can i find step by step instructions for ARI pretty photo - to install, configure and use (code ex: {ppgallery}stories/galleries/1{/ppgallery}) in a. article and 2. module to create a simple image gallery to show in a lightbox with only one clickable thumbnail?

2. insert vimeo video in custom module to play in a lightbox.

i hope this is not very complicated as my knowledge of code is limited! :(please help!!!

Hello,

1. Installation instructions can be found in readme.txt file from extension's archive. Documentation for the module and the plugin from the package can be found on module/plugin settings page in "Description" field. Click by "Detailed help here" link.

2. Install "ARI Pretty Photo" module then install, configure and enable "System - ARI Pretty Photo Anywhere" plugin (Set "Mode" parameter to "Anywhere"). Place the next code in custom module:

```
{ariprettyphoto activeType="rcontent" width="500" height="350" url="http://vimeo.com/8245346" title="Video"}Show video{/ariprettyphoto}
```

Regards,
ARI Soft

Tks, what's the code for:

1. image gallery with single thumbnail in Joomla 1.5 article
(i used to use pPGallery... it was something like - {ppgallery}stories/galleries/1{/ppgallery})

2. image gallery with single thumbnail in Joomla 1.5 custome module

tk's :)

Could you explain what do you mean under "image gallery"? Show custom HTML code (image) and if a user clicks by it, show images from specific folder(s) into the lightbox?

i figured out the image gallery. tks :) but i still have a few questions...

1. I tried Fixed position yes and no ... but the lightbox still scrolls. i do not want it to scroll... how can i achieve this?
2. can i display pdf and ms word files in the lightbox? if yes, what's the code?
3. i'm using only 'ARI Pretty Photo Anywhere' ... what is a. plugin-ARI Pretty Photo and b. module-ARI Pretty Photo for?
4. under 'Specific setting' - 'Layout type - Single image' how can i add the 'Shadow Theme' (from simple gallery)?

1. Could you provide link to a page where we can see the problem? This option works fine on our test server.
2. The extension doesn't support this feature directly, but you can use ARI Docs Viewer plugin to embed MS Word or PDF document into an article and then load this article into the lightbox.
3. "ARI Pretty Photo" module is used as module, all parameters is configured into module settings and module can be shown in module position. "System - ARI Pretty Photo" plugin provides ability to use the lightbox using HTML code. More details how to use the plugin or the module can be found in "Description" field on module/plugin settings page.
4. Themes can be used for image gallery not for single image.

tk's for your reply. right now our website is hosted locally ... may be when it's hosted on our goDaddy server, the fixed position feature will work... if it doesn't i'll send you the link so you can look into it. tks again :)

LINK: www.kis.in

CODE I'm using:

```
{ariprettyphoto activeType="imglist" dir="images/stories/galleries/sl" type="customtext"}{/ariprettyphoto}
```

QUESTION: I want the lightbox to always be centered on the screen. http://www.ari-soft.com/images/fbfiles/images/fixed_position.png
