
Linking Pictures, open in Lightbox

Posted by eraz - 2012/02/12 13:41

I am writing a photo blog frequently on my homepage, sometimes i am linking to pictures directly on my server, for example:

"This is my example text, this part is linking to an image"

The picture will then be opened in a new browser tab. I don't really like this, i would prefer, to open that image in a single pretty photo lightbox window, without leaving the photo blog article. Is it somehow possible to do so?

Hello,

Do you want to show an image into the lightbox if a user clicks by a text link? If yes, it can be done with help "System - ARI Pretty Photo" plugin, HTML code will look like:

click here

Regards,
ARI Soft
