
Flickr Collection or User Photoset

Posted by marcohofman - 2012/03/06 18:40

When trying to show a Flickr collection or everything a specific user has published, I get no output from Sexy Lightbox module (Empty Message). Showing 1 photoset works fine. Is it the UserId? I am sure I am using the right Id (name, not a number).

Hello,

Could you send screenshot(s) of module settings page by email?

Regards,
ARI Soft

Thank you for the quick response. 7 minutes response-time is impressive.
The answer was: replace Id-name (as found in url of your flickr-collections) by an Id-number (xxxxxxx@N00) you can find using <http://idgettr.com/>
