
Can\'t find a way to show text under the photo

Posted by eleclipse - 2012/03/29 18:45

Dear admin,

Sorry to be bothering you again :(

I really can't find a way to put some text under an thumbnail (before i click on it) like in the demo with the car (http://www.demo2.ari-soft.com/ari-pretty-photo.html?theme=dark_rounded) where i could see audi 80 not only in the bigger image but also under the smallest and on tue up-left side of the larger image.

Is there a guide for dummy or similar? :P

Thanks in advice for any help?

Hello,

It is possible to set titles for images in a CSV file. A link to a sample CSV file and instructions how to use it can be found in "Description" field on "ARI Pretty Photo" module settings page.

Regards,
ARI Soft
