
I can't save module parameters [solved]

Posted by claudioconti77 - 2012/04/08 09:28

I'm trying to set module to display a photo gallery but everything I change in "Additional Parameters" section (sort by, sort direction, etc. and specially directories), is not saved. So I cant' visualize the gallery.

Where am I doing wrong?

Thanks in avance.

Hello,

Check that "System - ARI Extension" plugin is installed and enabled.

Regards,
ARI Soft

In our web is not present the System - ARI Extension Plugin. We only have the System ARI Pretty Links, ARI Pretty Photo and ARI Pretty Photo Anywhere.

Where is the System - ARI Extension plugin?

We install the .ZIP downloaded like the steps you indicate in the readmore.txt file

Thanks

Hello,

"System - ARI Extensions" plugin is installed automatically by "ARI Pretty Photo" module. If you want to install it manually, you can find plg_system_ariextensions.zip archive in mod_ariprettyphoto.zip archive from ariprettyphoto_unzip_first.zip archive.

PS: The plugin is required only if you use Joomla! 1.6, it doesn't require for Joomla! 1.5.

Regards,
ARI Soft
