
ARI Pretty Photo: error occurs

Posted by alidan - 2013/01/29 21:24

Dear Friend,

I was using your product in joomla 1.5

I setup a new website in joomla 2.5 and installed pretty photo.

1. I enabled modules

2. I enabled all plugins

What is wrong? I get this error

thx

My content contains

```
{ariprettyphoto moduleId="138"} {ariprettyphoto activeType="imglist" dir="images/stories/videos/goz"}{/ariprettyphoto}
```

but on the screen I just see this error message instead of photos

thx

Sorry, but what error occur? Is it possible to see the problem anywhere?

BTW, the provided plugin code is incorrect. It is not possible to use one plugin code inside another plugin code. Use the following code:

```
{ariprettyphoto moduleId="138"}{/ariprettyphoto}  
{ariprettyphoto activeType="imglist" dir="images/stories/videos/goz"}{/ariprettyphoto}
```

Could you provide a temporary access to your J! backend by email so we can investigate the problem?
