Image Gallery thumbnail settings

Posted by micthemouse - 2014/08/13 22:55

_____

I am using the Module for ARI Pretty Photo. I have tried both the single image and the simple layout. The photos appear just fine on the page, but they are really big. The photos work and their size is fine in the actual lightbox. I have tried to use the thumbnail settings to adjust the size of the photos. Nothing I have tried works. In fact if I put any kind of number in the thumbnail width and height boxes then nothing will show on the page as in nothing at all loads. It is completely blank. When I remove the numbers then the page loads fine, but I still have a really big photo. I was hoping to not have to manually resize the images for display on the page. Any help would be appreciated.

_____

Hello,

Could you send screenshot(s) of module settings page and a link to a page where the problem occurs by email so we can investigate it?

Regards,
ARI Soft
