
Small overlay Images

Posted by propolis - 2015/06/03 06:43

Hi,

When I select a image that is being displayed, it opens the image in large size, BUT also shows all the other photos as an overlay at the bottom of the large photo.

How can I stop the small photo overlay from being displayed.

Hello,

Set "Gallery thumbnails" parameter to "No" in module/plugin settings.

Hi,

That does not seem to have any affect.

Goto <http://www.international18skiff.org> and select 'Mark Foy Sailing Report - Day 0 - Practice' in latest news. When it opens click on any image and then the small overlay ones are still showing

Could you provide a temporary access to your J! backend by email so we can check settings?
