## About borders of the table that display thumbnails

Posted by decorientale - 2010/11/11 12:17

---

Hello,

Where i can find in CSS the table border, i want to remove it . Thank you. <http://www.ari-soft.com/images/fbfiles/images/tableborder.jpg>

Hello,

Could you specify what table you mean? Do you use 'Simple gallery' layout type? Could you provide link to page where can see this issue?

Regards,  
ARI Soft

Thank you for this quick answer.

Sorry , my bad, the attached file was too small . Here is bigger one and the table is :

---

Add the following CSS rule to site template CSS file:

```
TABLE.prettyphoto-simple-table
{
border-width: 0;
}
```

I was done that before this thread, no results, even with { border: none; } . The result are this #8099b3 color border. My bet was on a override on site main template css. Followed that trail and remove it, with Firebug that pointed me that.Thank you for your time and quick response.

I know this is a another thread but i'll give the shot: May I suggest putting in distribution package the psd files for buttons in case of user translations ? Or a text over empty button that could take valors from language files (modded when install) to reflect template language ?

Again, awesome support, thanks.

The extension is based on Pretty Photo jQuery plugin. Unfortunately this plugin doesn't provide PSD sources, but you can contact plugin developer and request sources.
