## Pretty Photo works on home page only

Posted by samdyer - 2010/12/19 22:31

---

Pretty Photo was working on all pages of my site ([www.employeehumor.com](http://www.employeehumor.com)), but recently stopped working on all sub pages. I uninstalled all recent modules and components uploaded prior to Pretty Photo's failure on sub pages, but no luck.

The pretty photo links I'm referring to are used in several places throughout the site, but the best examples are the links used in the footer of every page (i.e. Privacy policy and disclaimer). They now only work on the home page. All other pages show a small box with the same opaque background, but no content.

I love this plug-in and will drop any other extensions if there is a conflict.

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,  
ARI Soft

---

Try now please. "Look Busy Fast Button" module contained incorrect HTML code which caused the problem.

Thank you! I couldn't get this one figured out and appreciate the excellent support.
